Our Services

We offer a wide range of integrated services including print-to-post solutions. Our wide range of expertise in printing, mailing, logistics, and print advertising service makes us a preferred choice in our industry. We have been in this industry for two decades, and have the capability to process over 40 to 50 lakh articles per month. Our years of service in logistics and printing have provided us with the expertise required for delivering excellence. Our state-of-the-art equipment and systematic operations allow greater precision and efficiency, while getting things done in defined timelines.

Bulk Mailing

Our bulk mailing solutions are highly organized and optimally operated as per the requirement mix, and in line with the mandates introduced by the postal department. We have pioneered a mass mailing system that can send a large number of mails, envelopes, brochures, etc. through the postal department at pre-set intervals. We provide an exhaustive range of functions under our Bulk Mailing services.

Bulk SMS and E-mail

With our bulk e-mail and SMS services, our clients have been able to extend their reach in terms of marketing and increase conversions. We provide a unique, end to end, global carrier-grade mobile data service.

Logistics

We have robust systems to manage the flow of packages from the pick-up/origin point to the drop-off point as per the needs of our clients. The packages are channelled through our established courier network to ensure secure and efficient deliveries. We provide courier services through air, rail and road transportation across India. We analyze the dynamics of these three ways of transportation and determine the best optimization for the shipments accordingly. For our logistical operations, we own 15 vehicles and hire the services of more transport as per the requirements of our shipments.

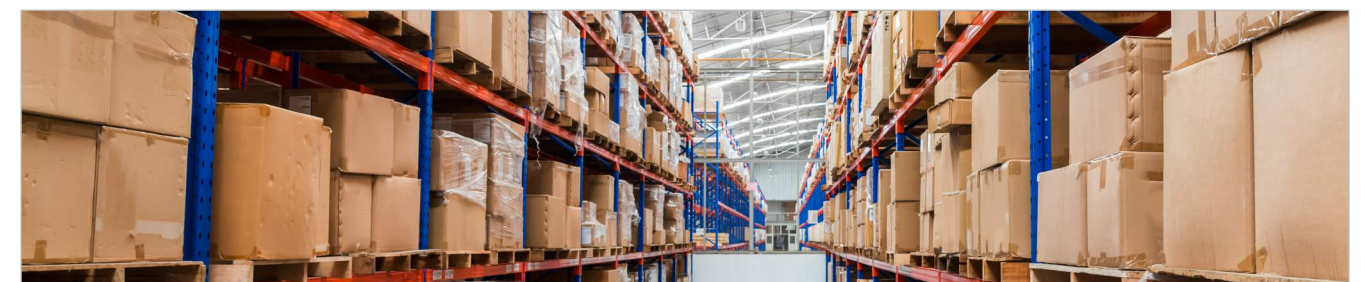

We provide courier, speed post and international courier services. We also offer packing and moving services, as part of our logistical services.

Depending on the type of package, we offer four types of courier services: Unsecured Shipments, Semi-secured Shipments, Secured Shipments and Bulk Shipments.

Storage and Record Management

In today's knowledge-driven world business access to records & information is no more an extra benefit; it's a basic need. And despite predictions to the contrary, the paperless office is still a long way off. A large amount of information in organizations still exists in a variety of physical formats. Organizations maintain their records for two main reasons: Statutory & legal limitations; and Referral purposes. DJ Mediaprint & Logistics Ltd is a complete service provider of records and documents management services. It provides physical storage and management for old and new records which you need to access and work with more often. As part of Documents Imaging & Archival, we offer hi-speed documents scanning and customized documents management applications services to our organizations. The system is capable of online storage, retrieval and management of electronic images of documents.

Our customized services in the area of Records and Information Management Services include:

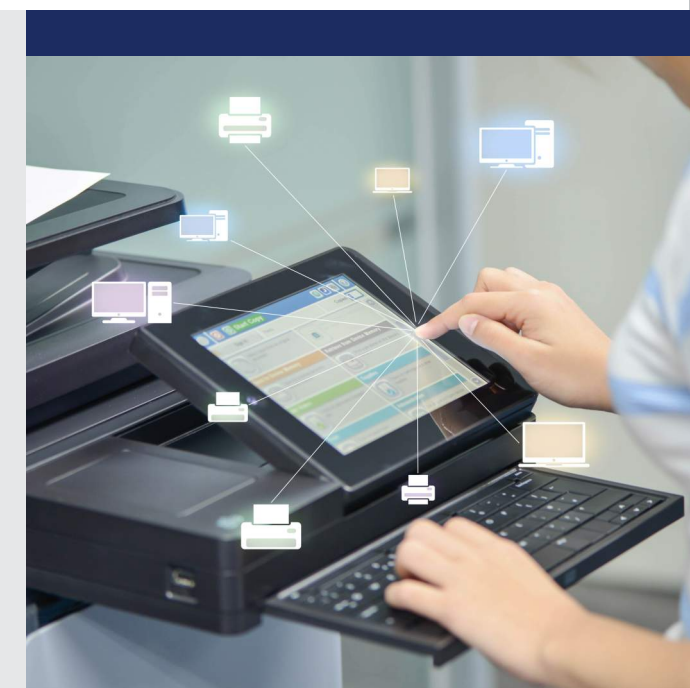

- Secured storage for business records and management services
- Data Tape storage and Back up rotation services
- Document scanning / processing and Image hosting services
- Business Process support functions, namely Data Entry, Backlog Scanning and KYC Verification
- High value items storage

Bulk Scanning

We have bulk scanning solutions for organizations that need scanning of large number of documents on a regular basis. Our scan software ensure that all the scanned copies are of good quality and also process these files.

The files that are thus created are a result of character recognition and other special features and the copies themselves have text searchable feature. Bulk scanning is an efficient and economical way for companies to outsource their scanning processes to be managed by professional set-ups and purpose-built systems.

Our services include off-site records storage, documents, scanning, rotation, evaluating and shredding solutions. We provide storage of documents on paper, in digital form and on tapes.

Printing Solutions

DJ Mediaprint & Logistics Ltd. provides an exhaustive array of printing solutions for clients belonging to several industries. We are equipped with technical, professional and operational expertise to offer various forms of printing solutions. Our highly organized nature of printing infrastructure and processes is also reflected in the ISO 9001:2015 certification awarded to us. We have a prodigious production capacity that can churn out 3 million magazines and 2.5 million books every month.

Variable Data Printing

Variable Data Printing (VDP) is a form of digital printing used when bulk printing is required with the same basic layout for each printed piece, but the text, images or graphics may change from one printed piece to another. For example, a letter that needs to be sent out to 10,000 people. The message will be the same for all 10,000 prints, but the names, addresses and pin-codes will be different for each letter. The software and digital applications that we use for this type of digital printing are best in the industry, and we also have a layer of quality checks and proof checks to ensure zero errors.

Our VDP solutions are also integrated with data storage and security, printing and shipping of the finished prints.

Some of our VDP outputs are:

- Bank Statements
 - Barcoded OMR Sheets
 - Barcoded Insurance Proposal Forms
 - Credit Card Statements
 - Demat Statements
 - Direct Mail Applications
 - Electricity Bills
 - Insurance Policies
 - Mobile-phone Bills
 - Personalised Delivery Instruction Books (for shares)
 - Personalised MICR Cheque Books
- Personalised Postal Ballots
 - Reminder Notices
 - Voter Lists
