The risks and uncertainties described in this section are not the only risks that we may face. Additional risks and uncertainties not known to us or that we currently believe to be immaterial may also have an adverse effect on our business, results of operations, financial condition and prospects.

You should not invest in this Issuing unless you are prepared to accept the risk of losing all or part of your investment, and you should consult your tax, financial and legal advisors about the consequences to you of an investment in the Equity Shares.

The financial information in this section is, unless otherwise stated, derived from our Restated Financial Statements prepared in accordance with Indian AS, as per the requirements of the Companies Act, 2013, and SEBI (ICDR) Regulations.

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some risks may not be material individually but may be material when considered collectively.
2. Some risks may have material impact qualitatively instead of quantitatively.
3. Some risks may not be material at present but may have a material impact in the future.

We cannot assure you that these proceedings will be decided in favour of our Company, our Group Company, our Promoters or our Directors, as the case may be. *Complaint u/s 138 read with section 142 of the Negotiable Instrument Act, 1881 (For details of these proceedings, see "Outstanding Litigation and Material Developments" on beginning from page 159 of this Draft Prospectus.)

2. *We operate in a highly-competitive and fragmented industry, and our business, results of operations and financial condition may be adversely affected if we are not able to compete effectively.*

The company operates in the highly competitive and fragmented printing and logistics services industries. The entry barriers in the business are low and numerous players operate in the industry. The company faces tough competition from a large number of unorganised and a few organized players. The margins of the company may be constrained in the future due to volatility in the price of raw materials and consumables and intense competition from new as well as established players.

Our future success depends on our ability to compete effectively, including by distinguishing our products, content or services from our competitors, by expanding our brands and titles, by providing higher quality content, expanding our distribution, sales and marketing forces, or by expanding our portfolio of digital products and educational services.

3. *Interruptions or performance problems associated with our technology and infrastructure may harm our business and results of operations.*

Our printing process may suffer a huge loss in form of wastage of our printing materials like paper, ink, man hours, due to interruption of power supply or machinery break down. Although there have not been instances in the past where interruptions or problems with our technology and infrastructure have caused performance issues which have material impact, we may in future experience disruptions, data loss, outages and other performance problems with our technology infrastructure due to a variety of factors, including infrastructure changes, introductions of new functionality, human or software errors, capacity constraints, denial of service, machinery break down, attacks or other security-related incidents. In some instances, we may not be able to identify the cause or causes of these performance problems within an acceptable period of time. It may become increasingly difficult to maintain and improve our performance, especially during peak usage times. To the extent that we do not effectively address capacity constraints, upgrade our systems as needed, and continually develop our technology and network architecture to accommodate actual and anticipated changes in technology, our business, results of operations and financial condition could be harmed.

4. *We are subject to certain government regulation and if we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required to operate our business, our business and results of operations may be adversely affected.*

Our operations are subject to certain government regulation and we are required to obtain and maintain a number of statutory and regulatory permits and approvals under central, state and local government rules in India, generally for carrying out our business. For details of approvals relating to our business and operations, see “Government and Other Approvals” on page 164. A majority of these approvals are granted for a limited duration and require renewal. Further, while we have applied for some of these approvals, we cannot assure you that such approvals will be issued or granted to us in a timely manner, or at all. We cannot assure you that we will be able to obtain such consent in a timely manner. If we do not receive such approvals or are not able to renew the approvals in a timely manner, our business and operations may be adversely affected. The approvals required by our Company are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

5. *The shortage or non-availability of power and water facilities may adversely affect our printing process and have an adverse impact on our results of operations and financial condition.*

Our printing processing unit requires substantial amount of power and water. Currently our power requirement is fulfilled by the supply from Mumbai State Electricity Board. Further, our company has also installed diesel generator to meet exigencies at our facility. However, we can't assure that our facility will be operational during the power failure. Further we source our water requirement from the supply received from Navi Mumbai Municipal Corporation. We have not made any alternate arrangements for supply of water at our facilities. Any disruption/non availability of power or water or any failure on our part to arrange alternate source of electricity and water supply, in a timely manner and at acceptable cost shall directly affect our process which in turn shall have an impact on our operations and results of our company.

6. *We rely on third party logistic providers, with whom we have no formal arrangements. Any disruption in our transportation arrangements or increases in transportation costs may adversely affect our business, results of operations and financial condition.*

We rely on third party logistic providers and consequently, any disruption in our transportation arrangements or increases in transportation costs may adversely affect our business, results of operations and financial condition. There are a limited number of such logistic providers and in the absence of a formal arrangement, we are exposed to fluctuations in transportation costs. Also, if the terms offered to such logistic providers by our competitors are more favourable than those offered by us, they may decline to provide their services to us and terminate their arrangements with us. We may also be affected by transport strikes, which may affect our delivery schedules. If we are unable to secure alternate transport arrangements in a timely manner and at an acceptable cost, or at all, our business, results of operations and financial condition may be adversely affected.

7. ***Our business and results of operations are dependent on the contracts, including certain short-term contracts that we enter into with our customers. Any breach of the conditions under these contracts may adversely affect our business and results of operations***

We have entered into some short-term as well as long-term contracts/ master service agreements with our customers which, depending on the customer, may contain certain terms and conditions. Any dispute with a customer with respect to such obligations could have adverse effects on our relationship with that customer and other current and prospective customers, reduce demand for our products, damage our reputation and harm our business, results of operations and financial condition. While we internally consider all such factors prior to entering into these contracts, we cannot assure you that we will be able to continue to enter into similar such contracts in the future, which are not more onerous than the contracts we enter into currently. Additionally, non-compliance with the terms of our contracts, including breach of confidentiality provisions, may subject us to damages or penalties, lead to termination of the contracts and also result in us being unable to attract further business in the future.

8. ***Our business is dependent on developing and maintaining continuing relationships with our clients and customers. The loss of any significant client or customer could have a material adverse effect on our business, financial condition and results of operations.***

Our business is dependent on developing and maintaining a continuing relationship with our key clients and customers. In the event of a significant decline in the demand for our products or services by our key clients, our business, results of operations and financial condition may be materially and adversely affected. There can be no assurance that we will be able to maintain the historic levels of business from these clients and customers or that we will be able to replace these clients in case we lose any of them.

9. ***The industry in which we operate, is labour intensive and our operations may be materially adversely affected by strikes, work stoppages or increased wage demands by our employees or any other kind of disputes with our employees.***

The industry in which we operate being labour intensive depends on labour force for carrying out its activity. Although we have not experienced any labour unrest, we cannot assure you that we will not experience disruptions in work due to disputes or other problems with our work force, which may adversely affect our ability to continue our business operations. Any labour unrest directed against us, could directly or indirectly prevent or hinder our normal operating activities, and, if not resolved in a timely manner, could lead to disruptions in our operations. These actions are impossible for us to predict or control and any such event could adversely affect our business, results of operations and financial condition.

10. ***The extent to which the Coronavirus pandemic (COVID-19) may affect our business and operations in the future is uncertain and cannot be predicted.***

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing “stay-at-home” orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future.

We are closely monitoring the impact of COVID-19 on our financial condition, liquidity, operations, suppliers and workforce. Any intensification of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, results of operations and financial condition.

On the basis of assessments of the impact of the outbreak of COVID-19 on business operation of the entity, the entity’s management may conclude that our business is not much impacted. However, the situation with COVID-19 is still evolving, also some of the various preventive measures taken are still in force, leading to highly uncertain economic environment. Due to these circumstances, the management’s assessment of the impact on the subsequent period is dependent upon the circumstances as they evolve.

11. ***The Peer review certificate of Statutory Auditor has been expired as on the date of signing of the restated financial information:***

The SEBI (ICDR) Regulations, 2018 requires the Auditor to have a valid peer review certificate issued by the Peer Review Board of the ICAI as on the date of signing the restated financial information. Where auditor earlier held a valid peer review certificate, but did not hold a valid certificate at the date of signing the restated financial information, the earlier

certificate shall be considered valid provided there is no express refusal by the peer review board to renew the certificate and the process to renew the peer review certificate was initiated by the auditor.

The Statutory Auditor of the Company i.e., ADV & Associates, Chartered Accountants earlier had a valid Peer Review Certificate which was expired on July 29, 2021 i.e., before the date of signing the restated financial information for this issue. The Auditor has initiated the process to renew the peer review certificate on September 22, 2021, which is still under process. However, if there is an express refusal by the peer review board to renew the certificate after the filing of this draft Prospectus, the company may have to change the existing statutory auditor.

12. Our Group company did not change its Object Clause in MOA.

Our current promoter has acquired M/s. Dynamic Superways and Exports Limited (Dynamic) in the year 2007. Dynamic was incorporated to act as Registrar to an Issue/Share transfer agent and registered with SEBI had surrendered its certificate of registration as RTI/STA and the said certificate was cancelled with effect from 29/12/2004. But the company (Dynamic) has not changed its object clause in MOA, while the business activity of the company has been changed. There is no assurance that any proceedings will not be initiated against the company, its Directors or Promoters in the future.

13. Our Registered Office and other premises from where we operate are not owned by us

None of our business premises is owned by us. Our Registered office, Corporate Office and other business premises are taken on rental agreement basis. We cannot assure you that we will be able to continue the above arrangement on commercially acceptable / favorable terms in future. For further details, see section “Our Business” on page 76 of this Draft Prospectus. If we are required to vacate the current premises, we would be required to make alternative arrangements for new offices and other infrastructure, and we cannot assure that the new arrangements will be on commercially acceptable/favorable terms. If we are required to relocate our business operations during this period, we may suffer a disruption in our operations or have to pay higher charges, which could have an adverse effect on our business, prospects, results of operations and financial condition.

14. Government initiative for Digitization and going paperless could have negative impact on us.

We are working with many mutual fund, Credit Card and Banking companies for supply of statement on monthly or periodically basis. Government thrust and awareness to such industry for going paperless could have a negative impact on our results of operations and financial condition. However, we are also updating ourselves and adding new line of business/features/products in our segment, we can't assure that we could retain our financial progress and growth in near future also.

15. Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow in certain financial years and which could affect our business and growth:

	<i>(Rs. in Lakhs)</i>			
Particulars	30-09-2021	31-03-2021	31-03-2020	31-03-2019
Net cash from operating activities	-74.68	112.89	68.59	127.85
Net Cash (used in) / from investing activities	-14.06	-74.31	-14.68	-224.76
Net Cash used in financing activities	99.12	-30.81	-85.95	90.75
Net increase/(decrease) in cash and cash equivalent	10.38	7.77	-32.03	-6.16

16. Our Company's insurance coverage to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work may not be sufficient.

Our Company has insured itself against some business or operational risks. But we cannot assure you that these would be sufficient to protect us against all material hazards which may result in disruptions of operations/monetary loss on account of stoppage of work. Any excess loss would have to be borne by us and our results of operations, cash flows and financial performance could be adversely affected.

17. We do not have long term agreements with suppliers of raw material and an increase in the cost of or a shortfall in the availability of raw materials could have an adverse effect on our business, results of operations and financial condition.

The price and availability of raw materials depend on several factors beyond our control, including overall economic conditions, production levels, market demand and competition for such material, production and transportation cost, duties and taxes and trade restrictions. We usually do not enter into long term supply contracts with any of the raw material supplier and typically place orders with them in advance for our anticipated requirements. The absence of long-term contracts at fixed prices exposes us to volatility in the prices of raw material that we require and we may be unable to pass these costs onto our customers. We also face a risk that one or more of our existing suppliers may discontinue their supplies to us, and any inability on our part to procure the raw material from alternate suppliers in a timely fashion, or on terms acceptable us, may adversely affect our operations and our financial performance.

- 18. We require high working capital for our smooth day to day operations of business and any discontinuance or our inability to acquire adequate working capital timely and on favourable terms may have an adverse effect on our operations, profitability and growth prospects.**

Our business demands substantial funds towards working capital requirements. In case there are insufficient cash flows to meet our working capital requirement or we are unable to arrange the same from other sources or there are delays in disbursement of arranged funds, or we are unable to procure funds on favourable terms, it may result into our inability to finance our working capital needs on a timely basis which may have an adverse effect on our operations, profitability and growth prospects.

- 19. The improper handling of our products, raw materials, or spoilage of and damage to such materials, or any real or perceived contamination/ inferiority in raw materials, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.**

Any shortcoming in the production or supply of our product due to negligence, human error or otherwise, may damage our products and result in non-compliance with applicable regulatory standards. Any allegation that our raw materials are of inferior quality resulting in inferior output could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis.

- 20. Our inability to expand or effectively manage our growing customer groups may have an adverse effect on our business, results of operations and financial condition.**

We have our own sales network and marketing team. To sell our products and services to our end consumers, we use modern trade channels. Our ability to expand and grow our product reach significantly depends on the reach and effective management of our sales network. We continuously seek to increase the penetration of our product into different customer groups. We cannot assure you that we will be able to successfully identify new consumers. Due to this our business and results of operations may be adversely affected.

- 21. Our actual results could differ from the estimates and projections used to prepare our financial statements.**

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

- 22. We have entered into certain related party transactions and may continue to do so.**

We have entered into related party transactions with our Promoters, its group members/ entities, Directors and other associates. While we believe that all such transactions have been conducted on arm's length basis, however it is difficult to ascertain whether more favourable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For further details regarding the related party transactions, see the disclosure on related party transactions contained in the financial statements included in this Draft Prospectus and, also see the section "Related Party Transactions" on page no. 146 of this Draft Prospectus.

- 23. Noncompliance with and changes in, safety, health and environmental laws and other applicable regulations, may adversely affect our business, results of operations and financial condition.**

We are subject to laws and government regulations, including in relation to safety, health and environmental protection. We cannot assure you that we will not be involved in future litigation or other proceedings, or be held liable in any litigation or proceedings including in relation to safety, health and environmental matters, the costs of which may be significant. Any accidents at our facilities may result in personal injury or loss of life resulting in the suspension of operations. The loss or shutdown of our operations over an extended period of time could have an adverse effect on our business and operations.

- 24. Our business and prospects may be adversely affected if we are unable to maintain and grow our brand image.**

Our brand and its reputation are among our most important assets and we believe our brands serve in attracting customers to our product in preference over those of our competitors. We also believe that continuing to develop awareness of our brand, through focused and consistent branding and marketing initiatives, among retail consumers, is important for our ability to increase our sales volumes and our revenues, grow our existing market share and expand into new markets. Consequently, any adverse publicity involving us, or any of our products may impair our reputation, dilute the impact of our branding and marketing initiatives and adversely affect our business and our prospects.

- 25. If we are unable to raise additional capital, our business prospects could be adversely affected.**

We intend to fund our development plans through our cash on hand, cash flow from operations and from the Net Proceeds. We will continue to incur significant expenditure in maintaining and growing our existing infrastructure. We cannot assure you that we will have sufficient capital resources for our current operations or any future expansion plans that we may have. While we expect our cash on hand and cash flow from operations to be adequate to fund our existing commitments, our ability to incur any future borrowings is dependent upon the success of our operations. Additionally, the inability to

obtain sufficient financing could adversely affect our ability to complete expansion plans. Our ability to arrange financing and the costs of capital of such financing are dependent on numerous factors, including general economic and capital market conditions, credit availability from banks, investor confidence, the continued success of our operations and other laws that are conducive to our raising capital in this manner. If we decide to meet our capital requirements through debt financing, we may be subject to certain restrictive covenants. If we are unable to raise adequate capital in a timely manner and on acceptable terms, or at all, our business, results of operations, cash flows and financial condition could be adversely affected.

26. Any delay or default in client payment could result in the reduction of our profits.

Our operations involve extending credit for extended periods of time to our certain customers and consequently, we face the risk of the uncertainty regarding the receipt of these outstanding amounts. As a result of such industry conditions, we have and may continue to have high levels of outstanding receivables. If our customers delay or default in making these payments, our profits margins could be adversely affected.

27. The average cost of acquisition of Equity Shares by our Promoters is lower than the Issue Price.

The average cost of acquisition of Equity Shares by our promoter is lower than the issue price. However, the promoters have acquired all the shares in face value, but due to allotment of Bonus shares, there acquisition price has gone below the face value.

Sl. No.	Name of the Promoter	No. of Equity Shares Held	Avg. Cost of Acquisition (In ₹ per Equity Share)
1	Mr. Dinesh Muddu Kotian	29,66,520	1.67
2	Mr. Santhosh Muddu Kotian	30,000	1.67

The average cost of acquisition of Equity Shares by our Promoters has been calculated by taking into account the amount paid by them to acquire, by way of fresh issuance or bonus issue, the Equity Shares less amount received by them for the sale of Equity Shares through transfer, if any and the net cost of acquisition has been divided by total number of shares held as on date of the Draft Prospectus.

28. The Promoters and Directors hold Equity Shares in our Company and are therefore interested in our Company's performance in addition to their remuneration and reimbursement of expenses.

Certain of our Directors (including our Promoters) are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. We cannot assure you that our Promoters will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Promoters may take or block actions with respect to our business which may conflict with the best interests of our Company or that of minority shareholders. For details on the interest of our Promoters and Directors of our Company, other than reimbursement of expenses incurred or normal remuneration or benefits, see "Our Management – Interest of Directors" and "Our Promoters, Promoter Group and Group Companies – Interest in our Company" on pages 106 and 118, respectively.

29. We are dependent on a number of key personnel, including our senior management, and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.

Our performance depends largely on the efforts and abilities of our senior management and other key personnel. We believe that the inputs and experience of our senior management and key managerial personnel are valuable for the development of business and operations and the strategic directions taken by our Company. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an adverse effect on our business and our results of operations. The continued operations and growth of our business is dependent upon our ability to attract and retain personnel who have the necessary and required experience and expertise. Competition for qualified personnel with relevant industry expertise in India is intense. A loss of the services of our key personnel may adversely affect our business, results of operations and financial condition.

30. Certain relevant copies of education qualification and experience certificates of our promoters/Directors are not traceable.

Relevant copies of education qualification and experience certificates of some of our promoters/Directors are not traceable. We can't assure you that back-ups for the relevant copies of educational qualifications will be available in a timely manner or at all. We have relied on personal undertakings provided from them.

31. Our Company has availed certain unsecured loans that are recallable by the lenders at any time.

Our Company had availed certain unsecured loans and may continue to do so in future that are recallable on demand by the lenders. In such cases, the lender is empowered to require repayment of the facility at any point in time during the tenor. In case the loan is recalled on demand by the lender and our Company is unable to repay the outstanding amounts

under the facility at that point, it would constitute an event of default under the respective loan agreements. For further details, please refer chapter titled “Financial Indebtedness” beginning on page 150 of this Draft Prospectus.

32. *Our funding requirements and the proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised.*

Our funding requirements and the proposed deployment of the Net Proceeds are based on management estimates and is subject to change in light of changes in external circumstances, costs, other financial condition or business strategies, and have not been appraised by an independent entity. In the absence of such independent appraisal, or the requirement for us to appoint a monitoring agency in terms of the SEBI Regulations, the deployment of the net proceeds is at our discretion. We cannot assure you that we will be able to monitor and report the deployment of the Net Proceeds in a manner similar to that of a monitoring agency. Further, we may have to revise our expenditure and funding requirements as a result of variations in costs, estimates, quotations or other external factors, which may not be within the control of our management. This may entail rescheduling, revising or cancelling planned expenditure and funding requirements at the discretion of our Board. Additionally, various risks and uncertainties, including those set out in this “Risk Factors” section, may limit or delay our Company’s efforts to use the Net Proceeds and to achieve profitable growth in our business.

33. *Our Promoters and Promoter Group will continue to retain control over our Company after completion of the Issue, which will allow them to influence the outcome of matters submitted for approval of our shareholders.*

Post completion of the Issue, our Promoters and Promoter Group will continue to hold approximately [●] % of our post-Issue Equity Share capital. As a result, they will have the ability to significantly influence matters requiring share-holders approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders’ meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any assignment or transfer of our interest in any of our licenses. We cannot assure you that our Promoters will not have conflicts of interest with other shareholders or with our Company. Any such conflict may adversely affect our ability to execute our business strategy or to operate our business.

34. *Any future issuance of Equity Shares may dilute your shareholdings, and sale of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Issue, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

35. *The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue and the market price of our Equity Shares may decline below the Issue Price and you may not be able to sell your Equity Shares at or above the Issue Price.*

The Issue price is based on numerous factors. For further information, see the chapter titled “Basis for Issue Price” beginning on page no. 52 of this Draft Prospectus and may not be indicative of the market price of our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue and may decline below the Issue Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Issue Price. Among the factors that could affect our share price are:

- Quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

36. *Any future acquisitions, joint ventures, partnerships, strategic alliances, tie-ups or investments could fail to achieve expected synergies and may disrupt our business and harm our financial condition and operating results.*

Our success will depend, in part, on our ability to expand our business in response to changing technologies, customer demands and competitive pressures. We have, in the past, explored and continue to explore opportunities on our own, or through tie-ups, acquisitions, strategic alliances, partnerships or joint ventures across countries and regions of focus. In some circumstances, we may also decide to acquire, or invest in, complementary technologies instead of internal development. While we are currently evaluating opportunities and speaking to several potential partners, we have not entered into any definitive agreements in relation to this. Further, the identification of suitable acquisition can be difficult, time-consuming and costly, and we may not be able to successfully complete acquisitions that we target in the future. The risks we face in connection with acquisitions may include integration of product and service offerings, co-ordination of R&D and sales and marketing functions and the diversion of management time and focus from operating our business to addressing acquisition integration challenges. Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could cause us to fail to realise the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

37. *Managing employee benefit pressures in India may prevent us from sustaining our competitive advantage which could adversely affect our business prospects and future financial performance.*

Employee benefits represent a major expense for us and our ability to maintain or reduce such costs is critical for our business operations. We may be required to increase employee compensation levels to remain competitive and manage attrition, and consequently we may need to increase the prices of our products and services. An increase in wages/ salaries paid to our employees may result in a material adverse effect on our profits in the event that we are unable to pass on such increased expenditure to our users or customers without losing their business to our competitors. Likewise, if we are unable to sustain or increase the number of employees as necessary to meet growing demand, our business, financial condition and results of operations could be adversely affected.

EXTERNAL RISK FACTORS

1. *Changes in government regulations or their implementation could disrupt our operations and adversely affect our business and results of operations.*

Our business and industry is regulated by different laws, rules and regulations framed by the Central and State Government. These regulations can be amended/ changed on a short notice at the discretion of the Government. If we fail to comply with all applicable regulations or if the regulations governing our business or their implementation change adversely, we may incur increased costs or be subject to penalties, which could disrupt our operations and adversely affect our business and results of operations.

2. *You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.*

Under current Indian tax laws, capital gains arising from the sale of equity shares within 12 months in an Indian company are classified as short term capital gains and generally taxable. Any gain realized on the sale of listed equity shares on a stock exchange that are held for more than 12 months is considered as long-term capital gains and is taxable at 10%, in excess of Rs. 1,00,000. Any long-term gain realized on the sale of equity shares, which are sold other than on a recognized stock exchange and on which no STT has been paid, is also subject to tax in India. Capital gains arising from the sale of equity shares are exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident. Generally, Indian tax treaties do not limit India's ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares.

3. *Public companies in India, including our Company, shall be required to prepare financial statements under Indian Accounting Standards.*

Our Company currently prepares its annual financial statements under Indian GAAP. The MCA, Government of India, has, through a notification dated February 16, 2015, set out the Indian Accounting Standards (Ind AS) and the timelines for their implementation. In accordance with such notification, our Company may be required to prepare its financial statements in accordance with Ind AS in future. Ind AS is different in many aspects from Indian GAAP under which our financial statements are currently prepared. Accordingly, the degree to which the restated financial statements included in the Draft Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in the Draft Prospectus should accordingly be limited.

4. *Taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.*

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- custom duties on imports of raw materials and components;
- Goods and Service

These taxes and levies affect the cost and prices of our products and therefore demand for our product. An increase in any of these taxes or levies, or the imposition of new taxes or levies in the future, may have a material adverse effect on our business, profitability and financial condition.

5. *Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business in particular.*

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

6. *We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and industry in which we operate contained in the Draft Prospectus.*

While facts and other statistics in the Draft Prospectus relating to India, the Indian economy and the industry in which we operate has been based on various web site data and IBEF that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “*Industry Overview*” beginning on page 56 of this Draft Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

7. *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.*

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

8. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfer of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

9. *The extent and reliability of Indian infrastructure could adversely affect our Company's results of operations and financial condition.*

India’s physical infrastructure is in developing phase compared to that of many developed nations. Any congestion or disruption in its port, rail and road networks, electricity grid, communication systems or any other public facility could disrupt our Company’s normal business activity. Any deterioration of India’s physical infrastructure would harm the national economy, disrupt the transportation of goods and supplies, and add costs to doing business in India. These problems could interrupt our Company’s business operations, which could have an adverse effect on its results of operations and financial condition.

10. *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India’s credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

11. *Natural calamities could have a negative impact on the Indian economy and cause our Company's business to suffer.*

India has experienced natural calamities such as earthquakes, tsunami, floods etc. in recent years. The extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

12. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India’s economy and our business. Incidents such as the terrorist attacks in India, other incidents such as those in US, Indonesia, Madrid and London, and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company’s business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

Introduction

Apart from being a critical driver of economic growth, Foreign Direct Investment (FDI) has been a major non-debt financial resource for the economic development of India. Foreign companies invest in India to take advantage of relatively lower wages, special investment privileges like tax exemptions, etc. For a country where foreign investment is being made, it also means achieving technical know-how and generating employment.

The Indian Government's favourable policy regime and robust business environment has ensured that foreign capital keeps flowing into the country. The Government has taken many initiatives in recent years such as relaxing FDI norms across sectors such as defence, PSU oil refineries, telecom, power exchanges, and stock exchanges, among others.

Market size

LOGISTICS INDUSTRY

OUTLOOK FOR THE FUTURE

The COVID-19 pandemic impacted livelihoods and businesses, disrupting global economy and supply chains across the world. The logistics industry helped ensure that global flow of goods, particularly essential items, remained largely unhindered despite lack of transport and disruptions in the supply chain. Hampered by the pandemic in the first half of the year, businesses bounced back later with shorter lead times, better at-door experience and increased safety.

COVID-19 forced the entire world to expedite its shift from 'offline' to 'online', with a reliance on the logistics sector. The Indian logistics market is expected to grow at a CAGR of 10.5 percent between 2019-2025 and brands are boosting this growth by leveraging cutting-edge technologies. Various economic indicators viz; GST collections and generation of e-way bills, improving demand across sectors (automotive, pharmaceuticals, chemicals, steel, cement, food and beverages), power consumption, railway freight and higher exports points towards revival of Indian economy. The Government's stimulus measures and enhanced focus on 'Atmanirbhar Bharat' are also expected to boost the economy in a sustainable manner. The Union Budget 2021 focused on continued spending to stimulate growth as the economy tries to recover from the impact of COVID-19. The outlay for the capital expenditure for the financial year 2021-22 has been increased by 26% YoY with a specific emphasis on infrastructure which, in turn, will provide boost to the employment numbers. While this would stretch fiscal consolidation path in the near to medium term, the fiscal deficit is budgeted to improve to 6.8% of GDP in 2021-22.

Technology has become the backbone of not just the logistics industry, but of almost every industry across the world. The ability to work from home was simply the start of what is now a technological revolution. The COVID-19 pandemic turned all into humans obsessed with technology. While consumers started practicing online shopping increasingly to mitigate fears of virus, merchants began to analyse evolving consumers behaviour, hence, taking their off-line business operations to an online platform. Today, by partnering with the third-party logistics providers who offer an 'end-to-end' service viz; automated warehousing, inventory management, same day/next day deliveries etc., the small and medium scale companies are establishing fortified online presence for themselves. Sellers are now digitizing their businesses to accelerate revival process and ensure their business does not become redundant.

The pandemic highlighted the importance of technology and digitalization. Organizations that were not able to adapt to this change were weeded out. Resilience and agility became traits that were valued and trusted, more than ever before. The logistics industry played a key role in facilitating the gap between the customer and the e-tail supplier.

Logistics players have increasingly begun to adopt new technologies such as data analytics, artificial intelligence and machine learning to enhance the operational efficiency and optimize cost and time. These technologies have played an instrumental role in reviving logistics sector post lockdown(s) and it is expected that embracing digitalization will be more than just a passing trend. This one is likely to be long-lasting and something that will shape the industry's future course. Robotics and technology such as drones are set to occupy the space in the future of logistics arena in offering new age solutions driving cost reduction, convenience and delivery cycle. We focused on digitalization and prioritized processes to drive productivity and efficiency across various functions in the organization. The future holds an underlying theme of a 'Technology Led Transformation' which would revolve around creating business models and having systems in place to ensure that the organization will survive in a 'no contact' society.

Your Company believes that the power of technology and automation would propel the sector faster in a forward direction and your Company will continue investing in these capabilities. Your Company is committed to continuously outperform and would invest in brand, people, technology, digitalization and automation to chart a new trajectory as we build our brand for future. Your Company will continue its focus on product innovations and service enhancement. Your Company is geared to face challenges for the years to come. Your directors look forward to improved performance in the coming years.

PAPER & PRINTING INDUSTRY –

The paper & paper products industry is one of the worst affected industries due to the outbreak of Covid-19 pandemic. The lockdown imposed in the last week of March 2020 resulted in closure of operations of paper industry in the initial phase. Even while paper industry's operations resumed with reduced capacities as restrictions eased, challenges remained in terms of logistics disruption and migration of labour. In addition to this, subdued demand from consumers also impacted sales. As a result, industry's sales plunged by 49.8% on a y-o-y basis during the June 2020 quarter. Closure of education institutions, adoption of work from home by offices, muted demand for printing of newspapers among others disturbed the consumption of paper & paper products.

Moreover, subdued demand also had an impact on prices of paper & paper products which further affected the revenues of industry during the quarter. The overall Wholesale Price Index (WPI) of paper & paper products segment declined by 2.1% y-o-y in the June 2020 quarter. The September 2020 quarter and the December 2020 quarter, however, saw some impact of easing of lockdown restrictions which had started 1 June 2020 onwards. With unlocking of economy, the user industries that procure packaging products from paper industry had gained some traction. Also, increase in usage of e-commerce activities by consumers to avoid infection supported the revenues of packaging segment of paper industry. In addition to this, some workplaces had resumed work from office (though at reduced capacities and in a gradual way) which aided the revenues of

paper industry's printing and writing segment. Another major consumer of printing & writing segment, education institutions like schools and coaching centres that had remained physically shut till September 2020 since lockdown could reopen 15 October 2020 onwards in a phased manner with states being given the authority. This, in turn, supported the industry's revenues in the December 2020 quarter. As a result, the y-o-y fall in sales narrowed down for the paper & paper products industry from 49.8% in the June 2020 quarter to 26.8% in the September 2020 quarter and 18.5% in the December 2020 quarter. Also, some improvement was seen in the industry's PAT margin on sequential basis as the margin improved from negative 2.9% in the June 2020 quarter to positive 1.2% and 2% in the September 2020 quarter and the December 2020 quarter, respectively. However, it is to be noted that the industry had reported negative PAT margin of 2.9% in the June 2020 quarter as against positive PAT margin of 9.3% in the June 2019 quarter and the PAT margin contracted in the range of 5.8%-6.6% in the second and third quarters of FY21 on y-o-y basis. The industry's sales and profit margins during the period April-December 2020 were affected not only on account of lower demand for paper & paper products in these quarters but also due to subdued prices for paper & paper products in this period. The overall WPI for paper & paper products had declined by 2.1% and 1.7% in the June 2020 quarter and the September 2020 quarter, respectively, which increased only by a marginal 0.6% in the December 2020 quarter on a y-o-y basis.

Outlook

With the ongoing vaccination program in India and with people now adapting to Covid-19 norms and environment, it is expected that the sales of paper & paper products industry will witness an uptick during FY22 on y-o-y basis backed by better paper demand and increase in its prices. The education institutions are likely to begin upcoming academic sessions physically at least for higher class students if not for all the students. Physical study sessions for higher class students have been witnessed in the past few months as well. This is expected to result in better demand for papers like printing & writing and maplitho that find their usage in education institutions and offices. In addition to this, more employees are expected to work from office going forward. Another segment, newsprint which has seen sequential improvement in newspaper circulation and advertisement revenues is expected to see uptick only when businesses increase advertisement spends, offices and transport services (rail services, airline services) operate at pre Covid-19 levels and household circulation of newspapers return to normal levels. Considering these factors, the demand for paper & paper products from these segments is expected to improve by Q2FY22. The packaging segment, on the other hand, which has witnessed better demand compared to other segments during the Covid-19 induced lockdown period and thereafter in FY21 is expected to grow in FY22 backed by an increase in economic activities during the year. The paper & paper products industry is also likely to see further price increases during FY22 on account of returning demand and higher input prices.

STORAGE & RECORDS (DOCUMENT) MANAGEMENT

Market Overview

The global document management system market was valued at USD 5.51 billion in 2020 and expected to reach USD 11.47 billion by 2026 and grow at a CAGR of 13.05% over the forecast period (2021 - 2026). The document management system (DMS) market is ever-changing, driven by the need for increased efficiency in the workplace. The improving technologies and efficient execution of DMS are expected to gradually eliminate the traditional paper files concept.

According to Xerox, 46% of employees of small- and medium-sized businesses still waste time on inefficient, paper-related workflows daily. This signifies that smart document management systems can improve these processes. Companies that already deploy sophisticated document management systems gain a significant competitive edge.

The banking sector is also one of the most regulated sectors of the economy. Ensuring compliance with legal norms and regulations, as well as providing updates, is essential for any financial or credit company. This calls for a bank DMS to support the execution of the regulatory and legal framework. In December 2019, Deutsche Bank partnered with NetDocuments for its cloud-based legal DMS. This is likely to ensure secure and fast access to relevant documents for all legal department employees of the bank. Virtual learning environments amidst the COVID-19 pandemic have gained popularity. Managing and delivering complete online training solutions for volunteers are being observed, combined with document management systems to control the validation and publication of those training procedures and safety documents. In the healthcare sector, the lack of cohesive data across patients amidst the prevalence of electronic health records is further aiding adoption of such tools. COVID-19 cases have led to a lot of data being generated, due to the increasing number of patients being treated and the rising number of medical facilities. The effective and reliable management of documents generated, along with the need to minimize the use of paper to reduce operational costs and storage issues, is significantly driving the market studied.

Drivers and Constraints

Drivers

- Companies need to comply with various regulations imposed on them during audits and legal matters. Hence, there is a need for excellent and efficient records management and maintenance
- Reduction in the cost of storage worldwide has also favored the records management market
- Huge advancements in the technology space have enabled services like online records storage, storing digital copies of documents, and document imaging • Ease of use and faster retrieval times have played a major role in end users to shift gradually to record management and electronic records management services.

**Constraints**

- Economic conditions like higher levels of unemployment, inflation, tax rates and other economic factors affect the demand for record, management services.
- Increased market competition restrains expansion of all: Service providers compete for acquisition to undertake expansion activities, which increases the price for acquisitions and reduce opportunities for some.
- There can be an unexpected increase in spend due to factors including fuel hikes and hidden costs
- Organizational reluctance in support due to issues related to information confidentiality

PRINT MEDIA

The print media sector in India will only touch 75% of its fiscal 2020 revenue mark despite witnessing 35% year on year growth this fiscal, on a low base in FY22, according to CRISIL report. The sector clocked Rs 31,000 crore as revenue in FY20, with 70% of the revenue coming from advertisements and the remaining 30% being accounted for by subscriptions. Print media posted a 40% decline in revenue last fiscal amid the first wave. The same is expected to reach Rs 24,000-25,000 crore in FY22. The second wave has impacted ad revenues in the last quarter, as it correlates strongly with economic activity. We expect ad revenues to recover from the current quarter as economic activity revives,” Nitesh Jain, director, CRISIL Ratings, said. As per the report, sharp cost rationalisation measures and digitalisation of content will lead to a revival in profitability to 9-10%. Meanwhile, the bottom line will grow despite the 20-30% rise in newsprint prices over the last six months. The credit profiles of large print media companies will be resilient, cushioned by healthy liquidity and strong balance sheets, while for the remaining ones, liquidity management will be crucial, shows an analysis of CRISIL rated companies that account for 40% of the sector’s revenue as for subscription revenue, the sector is witnessing a structural change amid a shift in consumer preference towards digital news, from physical newspapers. This seems to be more prominent for English newspapers, which have a higher share in metros and tier-1 cities, where digital adoption is also higher. The English newspapers are focusing on monetisation of content by putting premium news behind paywalls and pushing digital subscription along with print subscription. Meanwhile, the non-English newspapers witnessed relatively resilient subscription revenue even in the first wave because of their strong roots in the hinterland. Due to this, the overall subscription revenue loss in FY22 will be limited to 12-15% of the pre-pandemic level. Furthermore, the report highlighted that unlike the experience in Western countries, print media will remain popular in India on factors like low cover price, ability to deliver original and credible content and people’s habit to read physical newspapers.

In the current scenario, logistics sector in India plays a crucial role in terms of support to the national economy. Strong growth in the sector is supported by government reforms, transportation sector development plans, growing retail sales and e-commerce. With implementation of Goods and Services Tax (GST), India has now become one big single market which was otherwise divided by different state level regulations. This has helped companies reduce logistics cost through redesigning of supply chain, increase scale of operations, achieve greater economies of scale. Indian government has also presented a draft of the National Logistics Policy with the objective of creating a national logistics e-marketplace for exporters and importers, thereby reducing the cost of logistics and increasing employment opportunities in the sector. A Multimodal Logistics Park Policy is also being formulated to promote movement of goods for domestic as well as global trade.

Logistics has now become an integral part of the value chain operations. With digital innovations and better offerings, the sector's growth can be further augmented by initiatives from the government such as rationalization of taxes for warehousing, push for digitization and focus on creating a skilled workforce for logistics and supply chain. Furthermore, the reduction in corporate taxes will also support the businesses during the overall economic slowdown.

Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days. For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Managers.
